Durée maximale de l'épreuve : 20 minutes
Préparation : 20 minutes

Déroulement de l'épreuve :

1) Expression orale en continu (5 minutes maximum)

   Présentation en anglais de l'analyse du dossier et de la situation en lien avec le secteur professionnel

2) Expression orale en interaction (15 minutes maximum)

   Échange en anglais avec l'examinateur à partir de l'analyse du dossier et des réponses apportées au questionnement accompagnant la mise en situation

L'usage d'un dictionnaire <u>n'est pas</u> autorisé.

Composition du dossier du candidat

Document A	**Vidéo** 'What is Cloud Computing (1'37)
Document B	**Infographie**: 10 Major Characteristics of Cloud Computing
Document C	**Texte** : Cloud Computing Services: The Threat of the Future
Mise en situation et questionnement

Cloud Computing Services: The Threat of the Future

Cloud computing has been the buzzword of the IT industry for the past few years, but is it becoming a threat? A recent study revealed that there is a significant increase in cloud services and cloud security threats. The report contends that this sudden

increase in attacks on systems would make an existing problem worse by exposing them to new vulnerabilities.

The popularity of cloud computing is rising. Large processing power and huge data storage infrastructure are required for future business expansion and growth. It makes sense that as more businesses and individuals migrate their IT systems and data to the cloud, security concerns exist. Cloud computing security should be a priority for every business that has at least some of its workflows on the cloud. Now that society is more conscious of the need to safeguard personal data against loss and illegal access, this is especially important. As a result, there is a great demand for proof that data is managed correctly and securely in order to stop data breaches and cybercrime. […]

While the cloud can offer greater flexibility and scalability, it also creates new vulnerabilities that must be addressed. Organizations must be aware of the risks associated with cloud-based services and take steps to mitigate them.

MISE EN SITUATION

You are the IT technician for a small retail company. The manager has heard of cloud computing and wants your opinion about it.

QUESTIONNEMENT

What is cloud computing?
Will I still be in control of my computer system?
What are the pros and cons that cloud computing offers?
If I decide to switch to cloud computing, what are the next steps?
